Dial locally on your LAN and globally over Internet. Forward, internal extension numbers, dial plan, ENUM and more!

- Locally on the LAN and globally over Internet
- Mimic conventional PBXs, 0 or 9 to reach PSTN
- Forward incoming calls individually to one or several phones
- Call using internal extension numbers, URIs, or conventional phone numbers
- ENUM checking before routing calls to PSTN
- Outgoing PSTN calls routed to best gateway
- New: Fork, ENUM, blacklist and allow users

What are the steps to get there?

1. Buy the Internet Gate
2. Buy the SIP Switch software addition.
3. Download a Dial Plan from Intertex' web page and fill in the user accounts.
4. To get started with the SIP Switch read the The Quick Guide
