

ENUM – Use phone numbers to dial SIP phones

Written by Administrator

Tuesday, 24 March 2009 09:53 -

Bypass the PSTN! IP all the way!

- SIP devices can have E.164 phone numbers assigned (just as ordinary phones)
- Use extension numbers to reach office colleagues
- The Internet Gate SIP Switch checks dialled phone numbers with ENUM to see if a SIP URL exists

What are the steps to get there?

1. Buy the Internet Gate SIP Switch software addition
2. Select a Dial Plan that checks ENUM before routing to PSTN
